

Yihong Container House Specification Sheet

Common Specification Fields

Size and usable area: confirm 20ft, 40ft, expanded area, custom combination or project layout.

Frame material: steel frame specification depends on model, use scenario and project requirement.

Wall and roof panel: options should be selected by climate, fire requirement, insulation target and budget.

Floor: confirm floor board, finish surface, bathroom area and waterproofing requirement.

Doors and windows: confirm quantity, material, glass type, opening direction and security requirement.

Electrical and plumbing: define voltage, socket standard, lighting, bathroom, kitchen and drainage scope.

Export Planning

Loading quantity should be confirmed by product model and final configuration before order.

Production time depends on model, quantity, customization, material availability and order schedule.

Installation guidance can include drawings, video support and remote communication for local teams.
